

CoSpaces Edu Product & Service Description

1.0 About CoSpaces Edu

CoSpaces Edu is an online platform that enables the creation of 3D and VR content for a variety of hardware platforms by providing building tools with 3D environments and 3D assets that can be chosen from a library, combined, customized and shared by users, as well as coding tools.

CoSpaces Edu focuses on classroom usage – by teachers and students. It provides features that are specifically designed for teacher and student use, as well as privacy-enabling and centralized group account management functions required by educational institutions.

1.1 Technical details:

- Cloud application: the CoSpaces Edu servers are located in the USA (managed by Amazon Web Services Cloud infrastructure at N. Virginia)
- Web browser: CoSpaces Edu works in the web browser (WebGL-enabled latest versions of Google Chrome or Mozilla Firefox are required)
- Mobile apps: CoSpaces Edu is available on mobile platforms (Android, iOS) that allow users to connect to the cloud and access content on mobile devices. (This is needed to view content in VR: the mobile apps allow the content to be viewed in gyroscope-based and stereoscopic modes. By inserting the mobile device into a VR headset users are able to experience their content in virtual reality.)

1.2 Technical features:

- 3D library of customizable environments and assets
- Animations
- Image web search & image import (regular, 360° images, GIFs)
- 360° image export
- Sound import
- Coding: Blockly, JavaScript, TypeScript programming languages

CoSpaces Edu is owned by:

Delightex GmbH.
Elsenheimerstrasse 45
80687 Munich
Germany

1.3 Teacher account features:

- Create own account
- Create students' accounts
- Access students' creations
- Real-time collaboration with students
- Give assignments to students / groups of students
- Reset students' passwords
- Share students' creations with others (e.g. among students, school or parents)

1.4 Student account features:

- Create own account (by invitation from teacher only, no email address needed)
- Take teacher's assignments
- Build 3D / VR content
- Real-time collaboration with other students

2.0 Personally identifiable information
