

Hygiene guidelines

We recommend following certain sanity precautions when sharing classroom devices in order to use CoSpaces Edu safely. With the Coronavirus pandemic, such precautions are more important than ever.

Computers

- Disinfect computer **keyboards**, for example using antibacterial wipes. You can also add keyboard covers, which are easier to clean.
- Disinfect computer **mice**, for example using antibacterial wipes.
- Make sure that your students have carefully washed their **hands** before and after using shared computers.

Mobile devices

- Disinfect **tablets**, for example using antibacterial wipes. You can also add protective tablet covers or disposable sleeves.
- Disinfect **phones**, for example using antibacterial wipes.
- Make sure that your students have carefully washed their **hands** before and after using shared mobile devices.

VR headsets

- Disinfect **headsets**, for example using antibacterial wipes (excluding the lenses).
- Disinfect the headsets' **faceplates**, for example using disinfectant wipes. Ideally, use disposable VR mask covers to be replaced before every new use.
- Disinfect **controllers**, for example using antibacterial wipes. You can also use controller covers which can be cleaned or replaced.
- Make sure that your students have carefully washed their **hands** before and after using VR headsets.
