Make VR & AR in the classroom

cospaces.io/edu
Get creative in just a few clicks
Enable students to make and explore their own content

Create anything in 3D
Simply drag & drop objects, characters and building blocks onto the stage. You can even upload your own 360° images and sounds.

Add animations with code
Use a visual programming language ideal for beginners or get access to scripting languages for more advanced coding.

Explore and get immersed
Step into a new dimension and explore your creations in an immersive environment.
Step into the future

Use revolutionary technology to physically connect with the curriculum.

With CoSpaces Edu, students can create their own content and use technology in a way that goes further than just consuming multimedia content.
Subject areas
CoSpaces Edu is suitable for any grade and subject

Languages & Literature
Use the platform for literature study and make vocabulary learning more fun.

Subject areas
CoSpaces Edu is suitable for any grade and subject

STEM & Coding
Explore scientific phenomena in 3D with coding and physics.

Makerspaces & Arts
Create freely and make your very own inventions and stories come to life.
Skills & benefits
The 21st Century educational platform

**Digital literacy**
Prepare your students for the future by enabling them to create, design, build and code in an engaging environment.

**3D, VR & AR creation**
Students learn to use a VR & AR creation tool, experiment with basic 3D modeling and develop their spatial skills.

**Creativity & understanding**
Enhance and further develop your students' creativity and imagination as they work on learning matter and demonstrate their understanding.

**Collaboration & teamwork**
Empower your students to work together and practice teamwork.
Teaching advantages
The all-in-one teaching platform

Class management
Easily manage your classes online. Create and share online assignments and observe student work.

Collaboration
Share ideas, work together in the same space and create virtually anything together.

Gallery of spaces & examples
Get inspired, copy and edit existing spaces from the Gallery or publish your own creations to share them with other educators and students.
Educator resources
Teaching material created for you

Onboarding material
CoSpaces Edu comes with several guidelines and resources to help you get started in your school.

Training
Get ready to teach with CoSpaces Edu by taking the free CoSpaces Edu online course.

Community & support
Connect with an active community of creative educators, exchange ideas or get support with questions along the way.
"You can even do this on your phone at home?"

A student using CoSpaces Edu for the first time

---

Jaime Donally  EdTech Presenter & Author

“I always share CoSpaces Edu with educators around the world because it takes our students from content consumers to content creators!”

---

Mike Page  Teacher & Google Certified Educator

“CoSpaces Edu is fully cross curricular and stimulates students to learn and push past their comfort zone.”

---

We care about student privacy

CoSpaces Edu is COPPA and FERPA compliant
Create on a computer or tablet

Compatible with Google Chromebooks
