

Presentation space

Lesson complexity: Beginner

Grades: Grade 1 and up

Subjects: Social sciences, Languages, Arts

Created by: CoSpaces Edu

Introduction:

This lesson plan is ideal to get started with CoSpaces Edu and works well as an introductory exercise for your first class. The task is to introduce yourself through a personal virtual space representing who you are. It can be a good idea to start the school year with a “Meet the teacher” virtual space which you can create as an example for the class and use to introduce yourself to your students while they discover CoSpaces Edu.

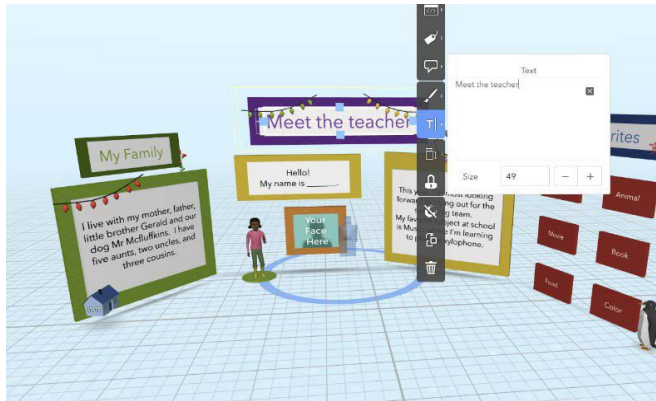

Benefits:

- Get students to introduce themselves with a presentation
- Help students to get to know each other more easily
- Encourage creativity and speaking up
- Have fun and motivate

Activity examples:

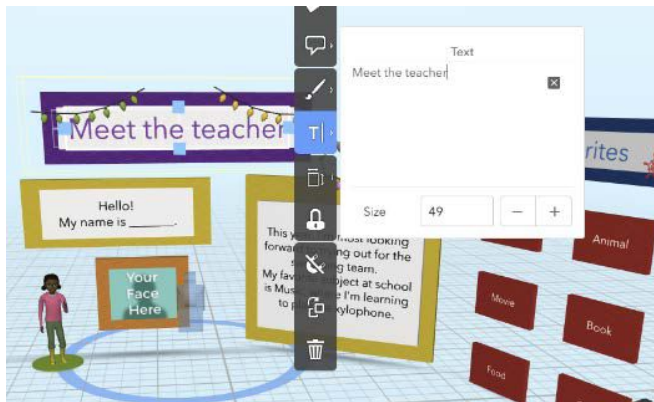

1. Ask each of your students to create a space of their own introducing who they are and visually representing each of them. Make them feel free to get creative!
2. Let students personalize their space and explore CoSpaces Edu further by using various 3D creation tools, adding decorations to the space, and maybe even using some animations to make their space more dynamic.
3. Optionally, ask your students to introduce themselves to the class, using their virtual space as a presentation support.

Creation guide

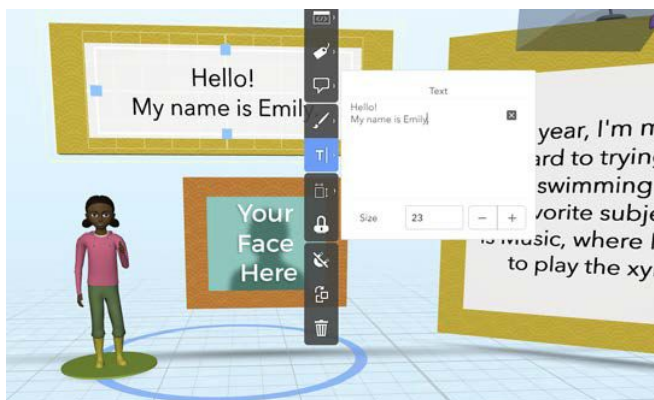

To get started, open the [presentation template](#) available in the CoSpaces Edu Gallery.

Select “Remix” to create your own personal version of this space.

Start by choosing the ideal title for your presentation space.

You can edit the title text by double clicking on the banner.

Add your name to the preset text field to start turning the scene into your own virtual presentation space!

Add your portrait to the preset frame. To do this, go to the “Upload” tab and import your headshot from your computer.

You will then be able to simply drag and drop your picture into your scene.

Double click on the image and select the “Attach” icon to place the image inside the frame.

Once you’re done with these basics, fill in all other frames and personalize your space as much as you want!

Note: This lesson plan can easily be adapted to foreign language classes by making students write all the content for their space in the target language.
