Virtual Seating Plan
Lesson plan

Created by Elly Heung Yuk Mui

Education level: From elementary
Subject: STEAM, social sciences, makerspaces
Format: Individual or in groups
Duration: Approx. 1 hour

Introduction and lesson objectives:

This lesson is a great class activity to conduct at the beginning of the school year: a moment when neither students nor the teacher know one another very well.

Creating a virtual seating plan in CoSpaces Edu is much more interesting than in a standard format because it provides an opportunity for students to introduce and represent themselves through animations and dialogues.

It will also give teachers a nice picture of the whole class.

Learning goals and student benefits:

- Learn 3D creation skills
- Develop spatial thinking skills
- Foster creativity
- Help students get to know each other more easily
- Have fun and motivate students
**Creation guide**

To get started, open the **Classroom template** available in the CoSpaces Edu Gallery or enter this link: [edu.cospaces.io/BTV-SEY](edu.cospaces.io/BTV-SEY)

1. Change the location of the seats based on the classroom setting. You may need to duplicate and rotate the desks and chairs.
2. Change the appearance of the characters to match your own style as a student in this classroom.
3. Double or right-click the characters to add **Speech** bubbles. In each character’s text bubble, type the name of the students in this class.
4. You can add animations to turn your seating plan to life. Double or right-click the characters and select any **Animation** you like.
5. You can also add various items to decorate your virtual classroom. Get creative!
